A metaplectic Jacquet–Langlands transfer for division algebras of prime degree, II
Revision Log: Draft 9 to Draft 10 (references to Part I renumbered)

Prepared by Claude (Anthropic) for David Joyner

November 8, 2026

Scope

Part I was reordered in its Draft 11 (literature and notation moved to §§2–3, Appendices A and B moved into §§6 and 7, Summary moved to the end); its revision log tabulates the old and new numbers. This draft updates Part II's references to Part I accordingly, at David Joyner's request. **No mathematical change**, and no change to Part II's own numbering (checked by comparing the `.aux` label tables of Drafts 9 and 10).

Changes

1. Every reference to a numbered item of Part I now uses Draft 11 numbering: 96 occurrences of 50 distinct references (table below). They were found in three ways: spans following "Part I" (renumbered by script from the Draft 11 table); the places that cite Part I without the prefix, which were edited by hand (the comparison table of §1.3, the dependency diagram of §1.4, the restatements (I1)–(I11) of §2.3, and two sentences in §6.2–§6.3); and a final search for any remaining hand-typed number, whose hits were all external citations or Part II's own sections. Every change was reviewed in a line-by-line diff. References to Part I, §1 (for example §1.3, §1.4, Assumption 1.1) are unchanged, as in Part I.

2. Statements of which draft is cited: "Draft 10 of Part I, whose numbering is that of Draft 8" is now "Draft 11 of Part I" (§1 lead-in, §2.3), and [P1] cites Draft 11.

3. §8 renamed "Notation and glossary", as in Part I; its lead-in points to Part I, §3, for the shared glossary.

4. Title line: Draft 10.

The shared `glossary.tex` was already renumbered for Part I, Draft 11; Part II's text and its glossary now cite the same draft of Part I.

References renumbered

Old (Part I, Drafts 8–10) and new (Part I, Draft 11) forms, with the number of occurrences.

Draft 9 text	Draft 10 text	count
Appendix A	§6.6	2
