A metaplectic Jacquet–Langlands transfer for division algebras of prime degree, I
Revision Log: Draft 10 to Draft 11 (editorial reordering)

Prepared by Claude (Anthropic) for David Joyner

November 8, 2026

Scope

Editorial changes requested by David Joyner. **No mathematical change**: no statement, proof, hypothesis or status label was changed. Blocks of text were moved; the only wording changes are those listed below. A sorted-line comparison of Drafts 10 and 11 confirms this.

Changes requested

1. **Appendix A moved into Section 4** (Orbital integrals and matching), as its last subsection, now §6.6 "Orbital integrals on an elliptic torus". Its lemmas A.1–A.5 are now Lemmas 6.8–6.12.

2. **Appendix B moved into Section 5** (Global covers and rational lifts), as its last subsection, now §7.4 "Cusp forms on finite central covers". Lemma B.1 is now Lemma 7.8. (It supplies Lemma 8.4(a), formerly Lemma 6.4(a), in the next section.)

3. **Literature review and notation moved to the beginning**, directly after the Introduction: §2 Literature, §3 Notation and glossary. (The section numbers 4 and 5 in the request are Draft 10's, in which Appendix A's material is used in §4 and the global covers are in §5.)

4. **Summary of results moved to the end**, as the numbered §12, after the Conclusion (§11).

5. **"Notation and conventions" renamed "Notation and glossary".**

The paper no longer has appendices.

Wording changes forced by the moves

1. "Appendix A/B" and "App. A" became section references (§6.6, §7.4) throughout, and "This appendix" became "This subsection" in the two moved lead-ins.

2. The lead-ins of §6 and §7 now mention their new last subsections.

3. §1: the lead-in points to the Summary in §12 "at the end of the paper" instead of "after this section"; §1.6 (Organization) was rewritten for the new order.

4. The dependency diagram in §1.5 used hand-typed section numbers; they are now `\ref`s, so they follow the new numbering.

5. A search for other hand-typed references to Part I's own numbers found none (the only hit was [JC, Remark 10.3]).

6. Title line: Draft 11.

Shared glossary

`glossary.tex`: its pointers into Part I were renumbered for Draft 11 (for example "Part I, Proposition 2.3" is now "Proposition 4.3"), and its header says that Part I pointers refer to Draft 11. Pointers into Parts II–IV are unchanged.

Effect on the other papers (not yet acted on)

Equation numbers are unchanged, but 91 section, subsection and theorem-like numbers moved (table below). Parts II–IV, the companion paper and `notes/mjl_running_example.tex` cite Part I by number, using Draft 8 numbering (identical to Drafts 9–10). In particular, Part II, Draft 9 (just completed) cites Part I as "Draft 10, whose numbering is that of Draft 8", and its §8 inputs `glossary.tex`, which now uses Draft 11 numbering; if Part II, Draft 9 is recompiled from the repository, its glossary pointers and its own pointers to Part I will therefore refer to different drafts. Recommended: a Part II Draft 10 that renumbers its Part I references by this table (and renames its §8 "Notation and glossary" for consistency), and the same renumbering in the Part III and IV exposition drafts and in the companion paper when it is next edited.

Old and new numbers

Equations: unchanged. Theorem-like environments keep their numbers within a section, with the section number shifted by +2 for Draft 10 Sections 2–9.

Draft 10	Draft 11
Summary (unnumbered)	Section 12
Section 2	Section 4
§2.1	§4.1
§2.2	§4.2
Definition 2.1	Definition 4.1
Lemma 2.2	Lemma 4.2
§2.3	§4.3
Proposition 2.3	Proposition 4.3
Remark 2.4	Remark 4.4
Remark 2.5	Remark 4.5
§2.4	§4.4
Proposition 2.6	Proposition 4.6
Section 3	Section 5
§3.1	§5.1
Proposition 3.1	Proposition 5.1
Remark 3.2	Remark 5.2
Remark 3.3	Remark 5.3
§3.2	§5.2
Lemma 3.4	Lemma 5.4
Proposition 3.5	Proposition 5.5
§3.3	§5.3
Example 3.7	Example 5.7
§3.4	§5.4
Theorem 3.9	Theorem 5.9
§3.5	§5.5
Proposition 3.11	Proposition 5.11
Corollary 3.12	Corollary 5.12
Corollary 3.13	Corollary 5.13
Section 4	Section 6
§4.1	§6.1
Definition 4.1	Definition 6.1
